

i500 inverters

0.25 ... 132 kW

Lenze makes many things easy for you.

With our motivated and committed approach, we work together with you to create the best possible solution and set your ideas in motion - whether you are looking to optimize an existing machine or develop a new one. We always strive to make things easy and seek perfection therein. This is anchored in our thinking, in our services and in every detail of our products. It's as easy as that!

On principle: Always perfect: the new i500

The i500 is ideal for numerous applications:
travelling drives, conveyor drives, shaper drives, pumps and fans, tool drives, hoist drives and winding drives.

Less means more!

Focused on the essentials: the new i500

i500 is the new inverter series - a streamlined design, scalable functionality and exceptional user-friendliness.

Less unnecessary elements

- High scalability in terms of the mains voltage range, rated power and modular structure
- Diagnostics via keypad, USB or WLAN

More cost savings

- Optimised solution for individual customer requirements
- Flexibility

Smaller size

- Compact size:
Up to 11 kW just 130mm deep and up to 2.2 kW just 60mm wide
- Side-by-side installation: can be mounted adjacent to each other

More space in the control cabinet

- Provides solutions in limited spaces
- Smaller control cabinets reduce costs

Less engineering expenditure

- Intuitively logical structure of parameters
- Easy controller integration
- Supports all current networks

More time for the essentials

- Saves time in engineering
- Reduction in potential error sources

Less installation expense

- Keyhole mounting
- Pluggable terminals up to 2.2 kW
- Out of the box operability. Simply connect, start, go!
- Plug-in memory module

More productivity

- Saves time during installation
- Fewer faults in use
- Lower costs in the event of a service

Less energy consumption

- Fewer inverter losses thanks to the use of cutting-edge technologies
- Energy-efficient

More sustainability

- Best efficiency values, lowest energy costs
- Future-proof thanks to DIN EN 50598

Less downtime

- Robust single board design
- Entire device produced by Lenze

Greater reliability

- Lower quality assurance costs in manufacture
- Reduces operational guarantee costs

Functionality

i500 provides a high-quality frequency inverter that already conforms to future standard in accordance with the EN 50598-2 efficiency classes (IE). Overall, this provides a reliable and future-proof drive for a wide range of machine applications.

Adjustable motor controls for three-phase AC motors

Motor functions	
<p>The diagram illustrates the relationship between various control signals and the motor's output. It shows a frequency setpoint selection signal that is constant at 60 Hz. A trigger signal initiates the motor's operation. Digital inputs 1, 2, and 3 control the motor's state: 'Enable inverter', 'Start enable', 'Run forward (CW)', and 'Run reverse (CCW)'. The output frequency signal shows a ramp up to 60 Hz, a dwell, a ramp down to 0 Hz, and another dwell. Status signals indicate when the motor is running, stopped, or has reversed direction.</p>	<ul style="list-style-type: none"> • Flying restart circuit • Slip compensation • Energy saving function (VFC-Eco) • DC braking • Oscillation damping • Skip frequencies • Automatic identification of the motor data • Braking energy management • Holding brake control • Voltage add-function • Rational Energy Ride Through (backup operation in case of mains failure) • Speed feedback (HTL encoder) • Brake resistor control (brake chopper integrated) • DC-bus connection (400 V devices)

Scalability

Easily scaled, the right i500 can be customised to suit the application. Here, “scaled” refers to two optimised products: the i510 as the basic design with predefined modes and the high-capacity modular i550 for a variety of applications. Which is the right one for you? See the following table:

i550-C3.0/400-3 and i550-C4.0/400-3 of the generation "A" are 90 mm wide.

As stated, the devices of the generation "B" with a width of 60 mm are 33% smaller.

Order codes i500

i510 or i550:

Delivery as complete inverter

If the same inverter is always inserted into the machine, the inverter can be ordered “out of the box”. i5x0 is the designation for both products; these products can be ordered in the power range of up to 11 kW.

i550: delivery as components

If different product versions are required in the machine, the various components can be ordered individually. Depending on the application, the components can be plugged together easily and without any further tools.
